----------------------------------	--

The foregoing balance sheet shows the financial condition of our Company at the close of its thirty-sixth fiscal year.

At the time of the acquisition of the Pacific Coast Biscuit Company, we assumed certain outstanding bonds of that Company. These matured on September 15, 1933, and were paid. The Company now has no bonds outstanding.

The New York Central Railroad Company is proceeding with the construction which will result in the removal of their grade tracks from

Tenth Avenue in New York City. At the expense of the railroad company a new building will be constructed for us over and around the elevated tracks on our property. The steel-work is now being erected and it is expected that the building will be completed in June, 1934. It will be connected by a bridge with our bakery on the west side of Tenth Avenue, thus joining all our plants in New York City. This will eliminate shuttle trucks, effect savings in our handling cost, and greatly

improve the operating efficiency of the plants.

Decrease in our sales volume is reflected in the decline in earnings. Our Company maintains its position in the industry and continues to have the good-will and cooperation of its customers. This Company has constantly maintained the quality of its products, knowing that continuation of its success depends on this policy rather than on lowering its standards to meet temporary price conditions.
